FBA and BIP Technical Adequacy Evaluation Tool (TATE)

District/State	Evaluator	Date of Review	IRR ☐ Yes ☐	No	IRR Score:
ID	Date of FBA	Date of BIP			

Directions: Score each item using the Product Evaluation Scoring Guide.

Component	Item	Scoring Guide	Score
Part I. FUNCTIONAL BEHAVIOR ASSESSMENT	 Input is collected from multiple people/sources to complete the functional behavior assessment. Check all that apply. Student interview Parent interview Teacher interview Rating Scales Direct Observations Record Review Efficient FBA (team meeting, ERASE, etc.) Other 	 0 = unable to determine 1 = 1 source/person or list of signatures with no detail 2 = two or more sources with supporting details 	
Data Gathering and Hypothesis Development	Problem behaviors are identified and operationally defined . (Easily observable and measurable). If more than one behavior is identified, it is clear which behaviors will be the focus of the FBA List problem behavior(s):	 0 = no problem behavior identified; 1 = behaviors are identified but definitions are ambiguous or subjective 2 = ALL identified behaviors are operationally defined. 	
	3. Baseline data on the problem behaviors are collected and detailed or summarized. The data are in addition to office discipline referrals (ODR), in-school suspension (ISS), and/or out of school suspension (OSS) data. Target Behavior Method Time Frame Analysis	 0 = unable to determine 1 = data collected, but omits at least one of the essential details 2 = data collected, AND includes all 4 essential details 	
	4. Setting events (i.e., slow triggers; antecedent events that provide the context or "set the stage" for a higher likelihood of problem behavior) are considered, identified (if present) and the contingency to the problem behavior is described. List setting events (slow triggers): Distant event Environmental, social, or physiological events	 0 = unable to determine, OR no indication setting events were considered 1 = identified, no contingency 2 = identified, AND contingency described, OR clear indication no setting events exist 	
	Antecedent events (immediate triggers) that precede and predict the occurrence of problem behavior are identified and specified. List antecedents (triggers):	 0 = none, OR not antecedents 1 = identified, lacks detail 2 = identified AND detailed 	

Component	Item	Scoring Guide	Score
	Antecedent events in which problem behavior is least likely to occur (or appropriate behavior is more likely to occur) are identified and specified. List antecedents:	 0 = none, OR not antecedents 1 = identified, lacks detail 2 = identified AND detailed 	
	 Consequences (i.e., how others respond immediately after problem behavior occurs) are identified. List consequence(s): An identifiable hypothesis or summary statement that includes three essential components (i.e., antecedent events, behavior, function) is present and linked to the antecedents and 	 0 = none, OR not consequences 1 = identified, lacks detail 2 = identified AND detailed 0 = no identifiable hypothesis, OR no link to 	
	consequences listed in the FBA. Check each component present in the hypothesis and the presence of its ink to the FBA data Antecedent events Description of problem behavior Link: Yes/No Link: Yes/No Link: Yes/No	FBA data 1 = statement missing 1 or 2 components, OR includes all 3 components but the antecedents or function are not valid, OR only partial link to FBA data 2 = includes all 3 components AND all components are linked	
	9. Function of behavior is one identified in research literature, provides specificity, and is linked to FBA data.	0 = no function identified, OR no hypothesis, OR function not in research literature	
	 ☐ Positive reinforcement—To get/obtain (attention, tangible, sensory stimulation) ☐ Negative reinforcement—To escape/avoid/delay (tasks, attention,, tangibles; painful/uncomfortable stimuli) ☐ Multiple functions (positive and negative reinforcement) 	 1 = function identified in research literature, not linked to FBA data. 2 = function identified in research literature, AND linked 	
	FUNCTIONAL BEHAVIOR ASSESSMENT SCOR		

Component	Item	Scoring Guide	Score
II. BEHAVIOR	10. Behavior plan is developed in a timely manner (e.g., within 30 days) upon completion of the FBA.	0 = no dates, OR >60 days 1 = >30 days 2 = ≤30 days	
INTERVENTION PLAN	11. Hypothesis developed from the FBA is included or referenced on the behavior plan	 0 = no hypothesis, OR substantially different 1 = similar (1-2 components) 2 = identical (3 components) 	
	12. A minimum of one strategy that addresses and modifies antecedent events listed in the FBA hypothesis (Item 8) is identified and described in enough detail for implementation. List antecedents in hypothesis List strategy(ies):	 0 = none identified, OR no link with hypothesis, OR not antecedent strategies 1 = identified, linked, NOT sufficient detail 2 = identified, linked, AND sufficient detail 	
	13. A minimum of one replacement behavior that will be taught to the student is identified, linked to FBA hypothesis (item 8), and described in enough detail for implementation. List replacement behavior(s) to be taught: List intervention strategies to teach replacement behavior	 0 = none identified, different function, OR function not identified in research literature. 1 = identified, linked, NOT sufficient detail 2 = identified, linked, AND sufficient detail. 	
	14. A minimum of one strategy that will reinforce the replacement behavior and provide the same outcome/function stated in the hypothesis (item 8) as did the problem behavior is identified, and described in enough detail to implement. Function identified in hypothesis: List reinforcement strategy(ies):	 0 = none identified, no link, OR no replacement behavior identified 1 = identified, linked, NOT task analyzed 2 = identified, linked, AND task analyzed 	
	15. A minimum of one strategy that eliminates the maintaining consequences identified in the FBA is described with sufficient detail to implement (i.e., changes the way others respond to problem behavior). Function identified in hypothesis: List strategies:	 0 = none identified, OR continue to provide same outcome 1 = identified, linked, NOT sufficient detail 2 = identified, linked, AND sufficient detail. 	

Component	Item	Scoring Guide	Score
	16. A need for a crisis plan is identified and justified by the team and plan procedures are described with sufficient detail if a need is indicated.	 0 = not addressed OR need identified but no plan 1 = procedures unclear 2 = specific procedures identified, OR no need indicated. 	
	 17. A specific plan for collecting monitoring data on both the problem and replacement behaviors following implementation of the behavior plan is included When/How often	 0 = no plan, OR unable to determine 1 = partial plan, lacks details, AND/OR does not address both problem and replacement behaviors 2 = plan fully described AND addresses both problem and replacement behaviors. 	
	18. A specific plan for collecting fidelity data on BIP implementation is included When/How often Who Method Review date	 0 = no plan, OR unable to determine 1 = partial plan, lacks details 2 = plan fully described
